

CONNECTICUT RECREATION  
AND PARKS ASSOCIATION

Letter of Support For  
SB 43, SB 90 and HB 5254  
AA Expanding The Recreational Land Use Act

CRPA | 1800 Silas Deane Hwy | Suite 172 | Rocky Hill, CT 06067

Planning and Development Committee:

**Please favorably report SB 43, SB 90 and HB 5424**, all of which would support the important public policy of increasing recreational land use by limited landowners' liability.

Open space has many benefits, including improving water quality, protecting groundwater, preventing flooding, improving the quality of the air we breathe, providing vegetative buffers to development, and producing habitat for wildlife.

Providing and encouraging recreational access to open spaces has other benefits: Hunting and fishing has become an economic building block in our national economy generating more than 1.6 million jobs and more than \$2 billion annually in salaries, wages, and business earnings. In 2006, more than \$70 billion was generated in sportsmen-related retail sales. With the "ripple effect" this translates to more than \$190 billion in total economic activity.

Our parks and open space provide students young and old with an opportunity to learn about our nation's unique historical and cultural heritage. Our public lands are outdoor classrooms where the learning experience never ends regardless of whether the lesson is about wildlife, history, geology or the environment. Children and families are able to connect to preserved landscapes in a hands-on manner they simply cannot receive by reading a textbook or watching a documentary.

There are intangible and invaluable benefits in preserving public lands and telling the stories of our state's natural and cultural heritage. Our state and local parks, trails, and greenways provide day-to-day getaways for children and families.

A study by Penn State University showed significant correlations to reductions in stress, lowered blood pressure, and perceived physical health to the length of stay in visits to parks.

Please help us continue to provide our citizens and visitors to enjoy the opportunities available, that which we have invested considerable resources towards preserving and making accessible for all. Municipalities should be afforded the same legal protection that has been given to private landowners for the very same reason that their immunity was granted initially.
